

SHUTTLE SG-15

The dedicated Price Verifier

The Shuttle SG-15 is an entry level, small and attractive price checker. The Shuttle features the latest technology. Interfacing is either through Wireless RF or hard wired Ethernet. The bright display has, depending on the font set, 3 or 5 lines and can display up to 20 characters per line. There is a choice of bar code scanners between the low cost single scan line CCD scanner or the high performance 20 scan lines laser scanner. Because of its size and the sympathetic good looks the Shuttle can be installed anywhere in a store, including on the shelves. This flexibility of installation is enhanced by the optional Power-over-Ethernet. The three available standard colours also greatly help to fit most interiors.

SCANTECH ID

General information

The Scantech-ID Shuttle SG-15 is the latest product developed by the company that has more than 10 years of experience in the field of customer information systems. Today we offer a choice of scanner (CCD single line or laser 20 omni directional lines), a choice of colour (Silver, Black or Red) and a choice of interface (WiFi or LAN).

Quality and Durability

The Shuttle comes with the same top quality as all other Scantech-ID products. So at a very competitive price the same quality and performance of more expensive products is available. Due to the high MTBF times of every component a long and service free operation time is secured.

Flexibility

The size of 180mm (height), 132mm (width) and 95mm (depth), makes the Scantech-ID Shuttle small enough to be installed in larger numbers per store. Even when mounted on a shelf it will not block products on display. The bright display makes it easy to read prices and product information.

Connectivity

The Shuttle comes standard with an easy-to-use configuration tool. A customized application program, not supplied by Scantech-ID, is necessary for retailers to operate the SG-15 in their specific environment.

SHUTTLE SG-15 specifications

Display High-bright blue-white display with 128x64 pixels (70x40 mm) Two proportional font sets

Interfacing Standard Ethernet, protocols: UDP, TCP Client, TCP Server Optional WiFi IEEE 802.11b with WEP128 encryption through Scantech-ID supplied PCMCIA card **Powering** Standard Mains PSU 100-240 VAC Optional PoE, Power Over Ethernet (IEEE 802.af)

Physical installation Easy-to-mount Click-and-go installation. **Dimensions** depth 95 mm, width 132 mm height 175 mm, weight 0.80 kg

Scanner Spica, high performance omni-directional scan/engine 20 scan lines 1350 scans/sec. Depth of Field (DoF) 200 mm / 8"

Barcode decoding EAN/ UPC/JAN: EAN-8 and EAN-13 UPC-A and UPC-E, JAN-8 and JAN-13, 2 and 5 digit add-on, Interleaved 2 of 5, Code 128, Code 39, Codabar, Code 93, MSI/Plessey. Bar code reconstruction software

Alternative Scanner CCD single line Scan Engine 270 scans/sec. **Software tools** User-friendly SG-15 Configuration and Update tool, Easy and remote (tftp) firmware upgrade, Free application software plus Ethernet driver.
